Contents of Volume 90 (1995)

A. Schömig, München
M. Schwaiger, München
D. J. Sheridan, London
B. Swynghedauw, Paris
E. Thaulow, Oslo
J. X. Thomas, Chicago
B. Török, Pécs

H. A. Tritthart, Graz
G. J. van der Vusse, Maastricht
P. D. Verdouw, Rotterdam
U. Walter, Würzburg
D. Yellon, London
H. G. Zimmer, München
I. H. Zucker, Omaha

Editor's Note	1	D. J. Hearse (London, United Kingdom) Stunnings: Three questions and concerns	263
Editorial		G. R. Heyndrickx (Aalst, Belgium) Hibernating myocardium	35
G. J. Gross (Milwaukee, USA) ATP-sensitive potassium channels and myocardial preconditioning	85	A. Ilebekk, J. Offstad, K. Lande, K. A. Kirkeboen (Oslo, Norway) Contractile pattern in acutely hibernating myocardium	16
Focussed Issues		R. Lerch (Geneva, Switzerland) Myocardial stunning: the role of oxidative substrate metabolism	276
G. Ambrosio (Perugia, Italy) The elusive difference between hibernation and stunning in patients	297	L. Mandinov, P. Kaufmann, O. M. Hess (Zürich, Switzerland) Coronary vasomotion of the stunned myocardium	288
C. S. Apstein, F. R. Eberli (Boston, USA) Critical role of energy supply and glycolysis during short-term hibernation	2	E. Marban (Baltimore, USA) Excitation-contraction coupling in hibernating myocardium	19
L. C. Becker (Baltimore, USA) Is stunned myocardium ischemic on a microvascular level?	282	E. Marban, W. D. Gao (Baltimore, USA) Stunned myocardium: a disease of the myofilaments?	269
Y. Birnbaum, R. A. Kloner (Los Angeles, USA) Therapy for myocardial stunning	291	L. H. Opie (Cape Town, South Africa) Chronic stunning: The new swith in thought	303
R. Bolli (Louisville, USA) Common methodological problems and artifacts associated with studies of myocardial stunning in vivo	257	G. A. Pantely, J. D. Bristow (Portland, USA) Hibernating myocardium: a hypometabolic state for energy conservation	23
R. O. Bonow (Chicago, USA) The hibernating myocardium: identification of viable myocardium in patients with coronary artery disease and chronic left ventricular dysfunction	49	S. H. Rahimtoola (Los Angeles, USA) Hibernating myocardium: a brief article	38
M. Borgers, J. Ausma (Maastricht, The Netherlands/Beerse, Belgium) Structural aspects of the chronic hibernating myocardium in man	44	B. Renstrom, A. J. Liedtke (Madison, USA) Adjustments in competitive substrate utilization in stunned myocardium during early reperfusion	279
P. G. Camici (London, United Kingdom) Absolute myocardial blood flow in chronic left ventricular dysfunction	285	J. Ross, Jr. (La Jolla, USA) Myocardial hibernation, stunning, or both?	41
J. M. Canty, J. A. Fallavollita (Buffalo, USA) Hibernating myocardium represents a primary downregulation of regional myocardial oxygen consumption distal to a critical coronary stenosis	5	W. Schaper (Bad Nauheim, FRG) Stunned myocardium, an opinionated review	273
S. E. Downing (New Haven, USA) Myocardial hibernation: relationship to a model for segmental dyskinesia	9	J. D. Schipke (Düsseldorf, FRG) Myocardial hibernation	26
A. Elsässer, J. Schaper (Bad Nauheim, FRG) Hibernating myocardium: adaptation or degeneration?	47	R. Schulz, T. Ehring, G. Heusch (Essen, FRG) Stunned myocardium: inotropic reserve and pharmacological attenuation	294
R. Ferrari (Brescia, Italy) Commentary on hibernating myocardium and its clinical relevance	52	R. Schulz, G. Heusch (Essen, FRG) Acute adaptation to ischemia: Short-term hibernating myocardium	29
R. Ferrari (Brescia, Italy) Commentary on myocardial stunning and its clinical relevance	300	M. Schwaiger (München, FRG) Identification of "hibernating myocardium" by imaging approaches	58
W. Flameng, B. Shivalkar (Leuven, Belgium) Hibernating myocardium, a clinical entity	55	S. F. Vatner, G. R. Heyndrickx (Southborough, USA) Ubiquity of myocardial stunning	253
K. P. Gallagher (Ann Arbor, USA) Myocardial hibernation in terms of the flow-function relationship	12	Invited Contributions	
H. Gewirtz (Boston, USA) Myocardial hibernation: unresolved physiological and clinical issues	32	E. Bassenge (Freiburg, FRG) Control of coronary blood flow by autacoids	125
G. J. Gross (Milwaukee, USA) Do ATP-sensitive potassium channels play a role in myocardial stunning?	266	D. Baumgart, G. Heusch (Essen, FRG) Neuronal control of coronary blood flow	142
		D. V. DeFily, W. M. Chilian (College Station, USA) Coronary microcirculation: autoregulation and metabolic control	112

R. J. Gryglewski, S. Chlopicki, P. Niezabitowski (Cracow, Poland) Endothelial control of coronary flow in perfused guinea pig heart	119	P. Gonschior, F. Gerheuser, A. Lehr, U. Welsch, B. Höfling (München, FRG) Ultrastructural characteristics of cellular reaction after experimentally induced lesions in the arterial vessel	160
J. I. E. Hofmann (San Francisco, USA) Heterogeneity of myocardial blood flow	103	B. D. Guth, T. Dietze (Biberach an der Riß, FRG) I_f current mediates β -adrenergic enhancement of heart rate but not contractility in vivo	192
J. A. E. Spaan (Amsterdam, The Netherlands) Mechanical determination of myocardial perfusion	89	D. D. Gutterman, D. A. Morgan (Iowa City, USA) Transmural regulation of myocardial perfusion by neuropeptide Y	348
Original Contributions			
L. C. Armiger, J. P. Headrick, L. R. Jordan, R. J. Willis (Auckland, New Zealand/Townsville and Nathan, Australia) Bound inorganic phosphate and early contractile failure in global ischemia	482	S. L. Hale, H. Hammerman, R. A. Kloner (Los Angeles, USA) Effect of two perfluorocarbon emulsions on reperfusion injury after coronary artery occlusion in rabbits	404
F. Berger, U. Borchard, D. Hafner, T. Kammer, T. Weis (Düsseldorf, FRG) Modulation of action potential duration by inhibition of the transient outward current in sheep cardiac Purkinje fibers	185	E. Ikeno, I. Kubota, T. Kondo, M. Yamaki, T. Shibata, H. Tomoike (Yamagata, Japan) Prolonged repolarization during hypoxemia in epicardial electrogram: difference from ischemia and a competitive action of cyclic AMP	451
M. V. Cohen, K. S. Snell, A. Tsuchida, D. G. L. Van Wylen, J. Downey (Mobile, Northfield, USA) Effects of anesthesia and K^+ ATP channel blockade on interstitial adenosine accumulation in ischemic rabbit myocardium	410	R. Janati-Idrissi, B. Besson, M. Laplace, M. H. Bui (Cretiel, France) In situ mitochondrial function in volume overload- and pressure overload-induced cardiac hypertrophy in rats	305
E. Czarnowska, E. Karwatowska-Prokopczuk (Warsaw, Poland) Ultra structural demonstration of endothelial glycocalyx disruption in the reperfused rat heart. Involvement of oxygen free radicals	357	F. M. H. Jeffrey, V. Diczuku, A. D. Sherry, C. R. Malloy (Dallas, Richardson, USA) Substrate selection in the isolated working rat heart: effects of reperfusion, afterload, and concentration	388
A. J. D'Alonzo, J. C. Sewter, R. B. Darbenzio, T. A. Hess (Princeton, USA) Effects of dofetilide on electrical dispersion and arrhythmias in post-infarcted anesthetized dogs	424	C. J. H. Jones, L. Kuo, M. J. Davis, W. M. Chilian (College Station, USA) α -Adrenergic responses of isolated canine coronary microvessels	61
D. J. Duncker, J. Zhang, M. J. Crampton, R. J. Bache (Minneapolis, USA/Rotterdam, The Netherlands) α_1 -Adrenergic tone does not influence the transmural distribution of myocardial blood flow during exercise in dogs with pressure overload left ventricular hypertrophy	73	J. S. Juggi, A. G. H. Abdulla, K. S. Bhatia, F. K. Ghaedi, Y. Makdisi, X. Mathew (Safat, Kuwait) Hypothermic cardioplegia reduces the occurrence of spontaneous diastolic myofilament motion of the ischemic-reperfused rat heart	314
S. Egashira, W. Mitsuoka, H. Tagawa, T. Kuga, H. Tomoike, M. Nakamura, A. Takehita (Fukuoka, Japan) Mechanisms of ergonovine-induced hyperconstriction of coronary artery after x-ray irradiation in pigs	167	S. Koba, N. Konno, H. Suzuki, T. Katagiri (Tokyo/Yamanashi, Japan) Disruption of sarcolemmal integrity during ischemia and reperfusion of canine hearts as monitored by use of lanthanum ions and a specific probe	203
E. O. Feigl (Seattle, USA) <i>Invited Comment: No adrenergic constriction in isolated coronary arterioles?</i>	70	F. Kolář, C. MacNaughton, F. Papoušek, B. Korecky, K. Rakusan (Praha, Czech Republic/Ontario, Canada) Changes in calcium handling in atrophic heterotopically isografted rat hearts	475
M. Gevers, M. W. M. Hack, H. R. van Genderingen, H. N. Lefeber, N. Westerhof (Amsterdam, The Netherlands) Calculated mean arterial pressure in the posterior tibial and radial artery pressure wave in newborn infants	247	V. V. Kubriyanov, B. Xiang, K. W. Butler, M. St.-Jean, R. Deslauriers (Winnipeg, Canada) Energy metabolism, intracellular Na^+ and contractile function in isolated pig and rat hearts during cardioplegic ischemia and reperfusion: ^{23}Na - and ^{31}P -NMR studies	220
C. Giessler, K. Pönnicke, C. Steinborn, O.-E. Brodde (Halle, FRG) Effects of PAF on cardiac function between normotensive and spontaneously hypertensive rats	337	J. S. Larsen, K. Kjeldsen (Copenhagen, Denmark) Quantification in crude homogenates of rat myocardial Na^+ , K^+ - and Ca^{2+} -ATPase by K^+ and Ca^{2+} -dependent pNPPase. Age-dependent changes	323

R. J. Leone, Jr., G. F. Merrill (Piscataway, USA) Inhibition of adenosine deaminase and administration of adenosine increase hypoxia induced ventricular ectopy	234	J. Tse, E. Rodriguez, M. Gonzales, H. R. Weiss (New Brunswick, USA) Effects of chemical denervation with 6-hydroxydopamine on myocardial responsiveness to isoproterenol in rabbits	380
P. Mayer, M. Möhlig, D. Idlibe, A. Pfeiffer (Magdeburg, Bochum, FRG) Novel and uncommon isoforms of the calcium sensing enzyme calcium/calmodulin dependent protein kinase II in heart tissue	372	R. Uhlmann, R. H. G. Schwinger, I. Lues, E. Erdmann (Köln, Darmstadt, FRG) EMD 53998 acts as Ca^{2+} - sensitizer and phosphodiesterase III-inhibitor in human myocardium	365
T. McClanahan, D. P. Ignasiak, B. J. Martin, T. E. Mertz, K. P. Gallagher (Ann Arbor, USA) Effect of adenosine deaminase inhibition with pentostatin on myocardial stunning in dogs	176	K. H. Vuorinen, K. J. Peuhkurinen, K. T. Kiviluoma, I. E. Hassinen (Oulu, Finland) Efflux of adenosine and total adenylate catabolites during alterations of the cellular energy state. An NMR study of continuous and discontinuous ischemia	211
E. O. McFalls, D. J. Duncker, H. Ward, P. Fashingbauer (Minneapolis, USA/Rotterdam, The Netherlands) Impaired endothelium-dependent vasodilation of coronary resistance vessels in severely stunned porcine myocardium	498	B. J. Zünkler, B. Henning, M. Gräfe, R. Bass, A. G. Hildebrandt, E. Fleck (Berlin, FRG) Electrophysiological properties of human coronary endothelial cells	435
